

a

Price, discount rate and capex carry 89% of NPV variance;
the two aluminium parameters carry 1.2%

**b**

The dominant parameter changes with the question asked

Source: this study. Saltelli scheme (Saltelli 2002; Saltelli et al. 2010) via SALib over plant_npv in tests/test_integration_uncertainty.py.
NPV panel N=4096 base (45,056 evaluations); other outputs N=2048 (22,528 each). Bars in (a) are SALib 95% bootstrap CI.
Input bands are ASSUMED scenario bands, not assays: the Vikarabad deposit is uncharacterized.
